Foreword

GB/T 18916 "Water quota" has been or is scheduled to be released The following sections.

Part 1. Thermal power generation; - Part 2. Steel joint ventures; Part 3. oil refining; - Part 4. Textile dyeing and finishing products; - Part 5. Papermaking products; Part 6. Beer manufacturing; - Part 7. Alcohol manufacturing; - Part 8. Synthetic ammonia; - Part 9. MSG manufacturing; - Part 10. Pharmaceutical products; - Part 11. Coal preparation; - Part 12. Production of alumina; - Part 13. Ethylene production; - Part 14. Wool textile products; - Part 15. manufacture of liquor; - Part 16. Production of electrolytic aluminum; - Part 17. Production of stacked bauxite; - Part 18. Copper smelting production; - Part 19. Lead smelting production; Part 20. chemical fiber filament weaving products; Part 21. Silk products; - Part 22. Manufacture of starch sugar; - Part 23. Production of citric acid; - Part 24. Hemp textile products; - Part 25. viscose fiber products; - Part 26. Soda ash; - Part 27. Urea; - Part 28. Industrial sulfuric acid; - Part 29. caustic soda. This part is part 25 of GB/T 18916. This part is drafted in accordance with the rules given in GB/T 1.1-2009. This part of the GB/T 18820 "industrial enterprises in accordance with the provisions of the provisions of water supply quota" to develop the principles set. This section is proposed by the Ministry of Water Resources and the National Development and Reform Commission. This part of the National Water Standardization Technical Committee (SAC/TC442) centralized. This part of the drafting unit. China Institute of Standardization, Xinjiang Fu Lida Fiber Co., Ltd., profit (Jiangxi) Chemical Fiber Co., Ltd., Tangshan Three Friends of the Group Xingda Chemical Fiber Co., Ltd., Hubei Golden Circle Co., Ltd., Xinxiang Chemical Fiber Co., Ltd., China Chemical Fiber Industry Association, China Textile Economy Research Center, Water Resources Management Center of Ministry of Water Resources. This part of the main drafters. Wang Peirong, Zhu Chunyan, Zhan Jing Lian, Cheng , Hu Mengting, Li Boming, Tian Ke, Yang Fengxiang, Wang Youchun, Cao Junyou, Dong Tingwei, Qiu Hua, Wang Yujie, Zhu Houhua. Water intake quota Part 25. Viscose fiber products

1 Scope

GB/T 18916.25-2016 is the Chinese national standard on norm of water intake - part 25: viscose fiber products, in the field of environment and health protection, safety. The /T suffix marks it as a recommended standard: it is not compulsory by itself, but it becomes binding as soon as a contract, a tender or a customer specification calls it up - which in practice is how most foreign buyers meet it. It was issued on 13 December 2016 by the General Administration of Quality Supervision, Inspection and Quarantine of the People's Republic of China; Standardization Administration of China, and has been in force since 1 July 2017. Classification: ICS 13.060.25, CCS P41. This page is published from the official record of the standard held by the Chinese standards administration: the identification, the dates, the classification and the issuing body are taken from there. The clause text, the tables and the numeric limits are in the document itself, which is delivered complete in English translation.

This part of GB/T 18916 specifies terms and definitions, calculation methods and water withdrawal quota for water withdrawal quota for viscose fiber products. This part applies to the existing, new and expansion of viscose fiber production enterprises to take water management.

2 Normative reference documents

The following documents are indispensable for the application of this document. For dated references, only the dated edition applies to this article Pieces. For undated references, the latest edition (including all modifications) applies to this document.

GB 3291 Textiles - Properties and test terms for textile and textile materials

GB/T 4146 Textile Terminology (Chemical Fiber Section)

GB/T 12452 General rules for water balance testing General rules for the compilation of water supply products for industrial enterprises GB/T Water - saving terminology for industrial water use GB/T General rules for the preparation and management of water metering equipment

3 Terms and definitions

GB 3291, GB/T 4146, GB/T 18820, GB/T 21534 and the following terms and definitions apply to this document.

3.1 Viscose fiber products viscosefiberproducts Recycled cellulose fibers made from viscose, including viscose filaments and viscose staple fibers.

4.1 General provisions

4.1.1 Water intake range The range of water intake refers to the amount of water that the enterprise extracts from a variety of conventional water sources, including water from the surface water (measured by the water supply), groundwater, Town water supply projects,

and other water or water products (such as steam, hot water, geothermal water, etc.) purchased from the market.

4.1.2 Scope of water supply The scope of supply of viscose fiber products, including the main production (dissolved, spinning, refining and other processes), auxiliary production (soft water station, boiler Room, air compressor station, sewage station, etc.) and ancillary production (office buildings, cafeteria, bathroom, factory dormitory, factory green, etc.).
