What this standard covers

This standard specifies test methods and rigid porous rubber materials and soft foam dynamic properties of an object by measuring the maximum deceleration falls when the specimen was measured. This test is mainly used for quality assurance. And this test is also used to obtain design data, Appendix A comment can be helpful in the design data. This standard only applies to packaging materials.

Document data

International classification (ICS): 83.100.

Chinese classification (CCS): G44.

Estimated length of the Chinese original: 12,157 words.

Adopted international standard: ISO 4651-1988, IDT.

Supersedes the earlier edition GB/T 18943-2003.
