What this standard covers

This standard specifies mounted on a wall or ceiling cable trunking and ducting systems for special requirements. This slot pipe systems are used when necessary to accommodate and used to separate conductors, cables or cords, and other electrical equipment. This system can be directly concealed or semi-flush on a wall or ceiling, but also indirectly mounted on a wall or ceiling or wall or ceiling before leaving on components installed. Cable trunking and ducting systems hereinafter referred to as the CT/DS. This section does not apply to conduit, cable tray or ladder (cable trays), other national standard applies to switches, sockets, or similar electrical accessories, as well as in the present system of carrying parts. Different forms of the system 101 shown in FIG. And expressed in Annex A.
