What this standard covers

This standard specifies requirements for terminal soldered assembly. This section applies to the overall interconnect terminals and wire assembly, also applies to the use of other related methods (ie: surface mount, chip assembly, termination assembly) in the assembly of the terminals and wires interconnecting parts.

Document data

International classification (ICS): 31.240.

Chinese classification (CCS): L94.

Estimated length of the Chinese original: 11,154 words.

Adopted international standard: IEC 61191-4-1998, IDT.
