What this standard covers

This standard applies to: build by IS, 8666 its hull length (LH) is not greater than 24m boats used thermosetting resin and glass fiber reinforced plastics. This standard glass fiber reinforced plastic and resin matrix and thus made Laminates material properties, specifies the minimum requirements. As long as other materials to meet the benchmark laminates the minimum requirements and performance. This standard is also applicable. Note: The development of this standard the fundamental reason is to harmonize existing standards and recommended procedures for acting on the hull and dinghy load scales provisions, past, because these standards and procedures are too diverse, thus limiting the range of boats in the world. Domestic acceptability.

Document data

International classification (ICS): 47.080.

Chinese classification (CCS): U37.

Estimated length of the Chinese original: 6,697 words.

Adopted international standard: ISO 12215-1-2000; IDT.
