What this standard covers

This standard defines the quality requirements: it does not depend on the type of thermally sprayed structures. It is not only the quality of thermal spraying in the workshop requirements, but also in the field of thermal spray quality defined. It provides a description of manufacturers to meet the requirements of the thermal spray member capacity guidelines. It can also be used as thermal spray manufacturers evaluate the basis of ability. When one or more of the following documents detailing the manufacturer 's quality requirements as promised members the ability to produce thermal spraying, the application of this section: the contract signed by the relevant parties, adopted standards, regulatory requirements. The requirements of this section can all be adopted, if the member can not be applied, the manufacturer may be selectively removed part. In the following cases, the requirements for the thermal spray control can provide a flexible framework
