

ICS 31.240
CCS L 94

**NATIONAL STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

GB/T 19405.1-2003

**Surface mounting technology -- Part 1: Standard method for the
specification of surface mounting component (SMDs)**
(English Translation)

Issued on: November 24, 2003

Implemented on: August 1, 2004

**Issued by: General Administration of Quality Supervision, Inspection and
Quarantine of the People Republic of China**

What this standard covers

This standard specifies the components to be used in a standard specification process conditions and the corresponding test conditions. This section is intended to meet the standard criteria and comply with the appropriate components of the various active or passive surface mount components can adopt a common welding process mounted on a substrate and for assembly. Therefore, the components of the design process should be classified severities. This section applies to its surface-mount applications requiring IEC System for evaluation included a variety of electronic components.

Document data

International classification (ICS): 31.240.

Chinese classification (CCS): L94.

Estimated length of the Chinese original: 17,170 words.

Adopted international standard: IEC 61760-1-1998, IDT.
