Foreword

GB/T 19460-2026 is a recommended national standard (GB/T) of the People's Republic of China, issued on 28 September 2026 by the State Administration for Market Regulation and the Standardization Administration of China, with effect from 1 October 2027.

This edition replaces GB/T 19460-2008.

It is under the responsibility of the China National Intellectual Property Administration.

Classification: ICS 67.140.10; CCS X55.

1 Scope

Quality requirements for Huangshan maofeng tea, a tea protected as a product of geographical indication, are covered by this standard. Huangshan maofeng is a green tea associated with the Huangshan area of China, and standards of this kind help define what qualifies for the origin name, which matters to growers, processors, and traders who rely on it.

Producers within the designated area, tea merchants, exporters and importers, inspection and certification bodies, and brand managers are the main audience. It is a recommended national standard (GB/T), so it is voluntary unless adopted by a contract or a certification scheme. This edition replaces GB/T 19460-2008. It was issued on 28 September 2026, and unlike many documents issued the same day it takes effect later, on 1 October 2027, which gives the trade more than a year to adapt. Buyers outside China can use it to understand the quality basis behind the geographical indication name.
