What this standard covers

This standard specifies a direct connection between the computer via a parallel or serial interface, telephone lines, local area network or other means of communication for data transmission format. The transmitted data using ordinary monitor or printer can display or print the character to be encoded. This format applies to AES, EDX, FABMS, ISS, SIMS, SNMS, UPS, XPS, XRF and other similar methods of analysis. It covers the spectrum, two-dimensional elements such as, depth of analysis, and a variety of other experimental techniques acquired data stream.

Document data

International classification (ICS): 35.240.70; 71.040.40.

Chinese classification (CCS): L67.

Estimated length of the Chinese original: 50,534 words.

Adopted international standard: ISO 14976-1998, IDT.
