Foreword

GB/T 19741-2026 is a recommended national standard (GB/T) of the People's Republic of China, issued on 28 September 2026 by the State Administration for Market Regulation and the Standardization Administration of China, with effect from 1 April 2027.

This edition replaces GB/T 19741-2005.

It is under the responsibility of the China National Light Industry Council.

Classification: ICS 83.080; CCS Y 28.

1 Scope

Plastic laminated films and pouches intended for liquid food packaging are covered by this standard. These are multilayer packaging materials used to hold products such as milk, juice, sauces and other liquid foods, and the document defines them as a product category for the purposes of specification and inspection. Packaging converters, film producers, dairy and beverage companies, food manufacturers and testing laboratories are the likely users, as are buyers who write packaging specifications.

It is a recommended national standard, issued on 28 September 2026 and effective from 1 April 2027. It replaces GB/T 19741-2005, so supply contracts that cite the earlier edition may be due for review. Use is voluntary unless required by contract. Food producers sourcing flexible packaging from Chinese converters, or exporting filled pouches to China, can use the document to align specifications with the current national text, alongside any separate food contact safety rules that apply.
