What this standard covers

This standard specifies: Determination of polyethylene (PE) Butt components tensile strength and failure mode test methods. This standard applies to: nominal outside diameter of not less than 9, mm-polyethylene (PE) pipe and pipe or spigot end pipes and fittings Butt joints. This method can be used in conjunction with other test methods, to determine for fusion welded joints quality.

Document data

International classification (ICS): 83.140.30.

Chinese classification (CCS): G33.

Estimated length of the Chinese original: 7,738 words.

Adopted international standard: ISO 13953-2001; IDT.
