What this standard covers

This standard applies to spray cleaning abrasives sampling and testing. Abrasives type and requirements of each type are included in various parts of ISO 11124. ISO11124 and GB/T19816 series is about the jet cleaning abrasives set of closely related standards. For these two series of standards can be found in all parts of the information in Appendix A. This standard specifies GB/T19816 of blast cleaning abrasives Determination of apparent density method. The purpose of testing is to confirm the integrity of metal abrasive. Shrinkage or internal hollow particles may reduce the apparent density.

Document data

International classification (ICS): 25.220.10.

Chinese classification (CCS): A29.

Estimated length of the Chinese original: 6,616 words.

Adopted international standard: ISO 11125-4-1993, IDT.
