Foreword

GB/T 20000 "Standardization Guide", GB/T 1 "Standardization Guide", GB/T 20001 "Rules for drafting standards" GB/T 20002 "drafting standards specific content" and GB/T 20003 "Special Procedures Standard to develop a" common standard constitutes a support system repair Set national standards for basic work.

GB/T 20000 "Standardization Guide" intended to be divided into the following sections.

- Part 1. General terms and standardization related activities;
- Part 2. the use of international standards;
- Part 3. references;
- Part 4. General Translation English translation of national standards;
- Part 5. English translation of the national standard universal representation;
- Part 6. standardization of good conduct;
- Part 7. management system standards and the development of demonstration;
- Part 8. Principles and Guidelines for the use phase of system code;
- Part 9. Using other international standardization documents.

This is Part 9 GB/T 20000 of.

This section drafted in accordance with GB/T 1.1-2009 given rules.

This section uses redrafted law revision using ISO/IEC Guide 21-2.2005 "regional or national standards and international standards Other international standardization documents - Part 2. Other than the international standard international standardization documents." this section ISO/IEC Guide 21-2.2005, 7.2 and 7.3 of this Part 7.2 merge and cancel 7.2.1 ~ 7.2.3 numbers change Sec is expressed; deleted this part of ISO/IEC Guide 21-2.2005 Annex A. In addition, this part of ISO/IEC Guide 21-2.2005 structure correspondence.

This part of ISO/IEC Guide 21-2.2005 and its main technical difference between the following reasons.

--- Will be used by other objects to increase the range of ISO and IEC standardization documents other than to other International Organization for Standardization released Similar documents, and the use by the national standards body to expand to our other standard reference for use by the method of this document to the full Foot of international standards requirements;

--- On normative references, with Part 1 of this section are not dated references GB/T 20000.1 "standardization guide.

Standardization and related activities in the generic term "instead of the date referred to ISO/IEC Guide 2.2004" Standardization and related activities Fixed common vocabulary "; with dated references GB/T 20000.2-2009" Standardization Guide Part 2. The State International standards "instead of the date referred to ISO/IEC Guide 21-1.2005" regional or national standards and international standards Other international standardization documents - Part 1. The use of international standards ";

--- Increase in Chapter 3 references GB/T 20000.2-2009, because this part of the terms and their definitions with more from GB/T 20000.2-2009;

--- Remove the ISO/IEC Guide 21-2.2005 terms and their definitions 3.9 to 3.14, because six terms and their definitions in GB/T 20000.2-2009 have been made to define, used in this section, except that the object is different, the same meaning;

--- Remove the ISO/IEC Guide 21-2.2005 5.2 International standards should only be adopted as national standards instead of other classes File type requirements, because, in GB/T 20000.2-2009 in China has specified the use of international standardized file to the same or Similar types of principles of national standardization documents;

--- Remove the ISO/IEC Guide 21-2.2005 Chapter 7 equivalent internationally standardized file number of the national standard method Single numbering, because our standard numbering system does not apply a single numbering.

This section also made the following editorial changes.

--- The ISO/IEC Guide 21-2.2005 Chapter 7 equivalent internationally standardized file

numbering in the national standards, according to the text File type and file type constant change were expressed to merge statements;

--- Remove the ISO/IEC Guide 21-2.2005 Annex A, because the standard number, and the degree of consistency in Appendix A identifies the sample package Including single and double numbers in two ways, and is a virtual example, only the adoption of dual numbering, the exemplary role of the appendix is not; the same time, this section has been in Chapters 7 and 8, respectively, and gives examples of the degree of conformance to the standard identification number of examples.

This part of the National Standardization Technical Committee of Standardization Principles and Methods (SAC/TC286) centralized.

This section drafted by. China National Institute of Standardization, Metallurgical Industry Information Standards Institute, China Electrical Equipment Industry Association, Shenzhen City, measuring seized

Introduction

National Standards specified in this document other than the international standard using methods other types of files, will promote the adoption of international standards Standardization than other types of files. Other types of files with international standards issued by International Organization for Standardization than variety, which, File type and quantity of ISO and IEC published the majority, including the technical specifications (TS), publicly available specification (PAS), Technical Report (TR), Guide (Guide), technology trends assessment (TTA), Industrial Technology Agreement (ITA), the International Workshop Agreement (IWA).

This section covers the ISO and IEC standards issued by other than other types of files in some types of files, after a period of time, according to Changing the specific rules of ISO and IEC about file types, may be revoked or replaced by a new type of file, it should pay attention to the change.

GB/T 20000.2-2009 The introduction explains the importance of international standards in the WTO/T BT protocol framework, international standards Outside other types of files to reduce trade barriers and trade facilitation might have the same effect.

Standardization file differences with the corresponding international standardization documents try to control principles apply equally to a minimum in this section.

Follow ISO and IEC copyright, rights, rules and policies related to sales of its publications.

Guidelines for standardization Part 9. Using other international standardization documents

1 Scope

This section GB/T 20000 specifies the use of other types of international standardization documents other than the international standard method, and equivalents mining no specific method of national standardization of documents used.

This section applies to other types of national standardization document international standardization documents other than the international standard, and for our other Level standardized files using other types of international standardization file reference.

2 Normative references

The following documents for the application of this document is essential. For dated references, only the dated version suitable for use herein Member. For undated references, the latest edition (including any amendments) applies to this document.

GB/T 20000.1 Guide for standardization - Part 1. General terms of standardization and related activities (GB/T 20000.1-2014, ISO/IEC Guide2.2004, MOD) GB/T 20000.2-2009 Standardization Guide Part 2. The international standard (ISO/IEC Guide21.1.2005, MOD)

3 Terms and Definitions

GB/T 20000.1 and GB/T 20000.2-2009 and as defined in the following terms and definitions apply to this document.

NOTE: In addition to other types of international standard international standardization file the following documents as defined in ISO and IEC release, other international standardization organizations Post Similar documents.

Technical specifications TechnicalSpecification; TS ISO or IEC publication, the future may become an international standard, but at this stage because of the following circumstances has not yet formed an international standard documents.

- Not supported yet approved as an international standard required;
- No consensus;
- The main technical content is still in the stage of technological development;
- For other reasons can not be released immediately as an international standard.

Note 1: technical specifications (including the appendix) may contain requirements.

Note 2: For the standardization of the same object can have multiple competing technical specifications exist.

Note 3: before mid-1999, the technical specifications are called Class 1 and Class 2 Technical Report.
