What this standard covers

This standard specifies the method of metal corrosion resistance. In this standard, the term "metal" including with or without corrosion protection of metallic materials. Outdoor accelerated corrosion test applies to: organic coatings on metal, metallic coatings (anodic or cathodic), chemical conversion coating layer metals and their alloys. The comparative method is particularly suitable for optimizing the test surface processing system.

Document data

International classification (ICS): 77.060.

Chinese classification (CCS): H25.

Estimated length of the Chinese original: 9,912 words.

Adopted international standard: ISO 11474-1998, IDT.
