What this standard covers

This standard specifies the stainless steel drop in sodium chloride evaporation system and test methods for nickel-base alloy resistance to stress corrosion cracking. This method gives the critical stress fracture, which can be used to classify the size of the relative performance of the different alloys environment.

Document data

International classification (ICS): 77.060.

Chinese classification (CCS): H25.

Estimated length of the Chinese original: 10,159 words.

Adopted international standard: ISO 15324-2000, IDT.
