What this standard covers

This standard specifies the method of inductively coupled plasma atomic emission spectrometry scandium content. This section applies to high-temperature alloys for the determination of the mass fraction of 0. 0002% to 0. 01% of the scandium content.

Document data

International classification (ICS): 77.040.30.

Chinese classification (CCS): H11.

Estimated length of the Chinese original: 9,912 words.
