

ICS 29.160.01

CCS K 20

**NATIONAL STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

GB/T 20160-2006

**Recommended practice for testing insulation resistance of
rotating machinery
(English Translation)**

Issued on: March 14, 2006

Implemented on: September 1, 2006

**Issued by: General Administration of Quality Supervision, Inspection and
Quarantine of the People's Republic of China, Standardization
Administration of the People's Republic of China**

What this standard covers

This standard specifies the rated power 750W (1hp) and above rotating motor armature and field winding measurement method. This standard applies to synchronous motors, induction motors, DC motors and synchronous condenser (does not apply to fractional horsepower motors). This standard also describes rotating motor winding insulation resistance of the typical characteristics and how these characteristics and the relationship between the winding condition. And recommended AC motor and DC motor winding insulation resistance minimum.

Document data

International classification (ICS): 29.160.01.

Chinese classification (CCS): K20.

Estimated length of the Chinese original: 19,118 words.

Adopted international standard: IEEE Std 43-2000, IDT.
