What this standard covers

This standard specifies test methods for measuring samples weighing plastic film or sheet thickness (see Chapter 3), and measuring the volume of plastic film or sheet thickness and the average test methods weighing mass per unit area (see Chapter 4). This standard applies to all plastic film and sheeting, particularly suitable for measuring the thickness by mechanical measurement is not accurate enough, such as measuring the thickness of the embossed film.

Document data

International classification (ICS): 83.140.10.

Chinese classification (CCS): G31.

Estimated length of the Chinese original: 6,640 words.

Adopted international standard: ISO 4591-1992, IDT.
