What this standard covers

This standard specifies the nominal voltage of the battery is powered by 12V, fixed on the agricultural tractor electrical connector and pin arrangement form, so that the sensor is mounted on the tractor and the formation of connections between the device interface signals need to be obtained from these sensors, this connector also has a low-current power connector interface, the main power supply for the instrumentation. This standard provides a short-term solution for the exchange of data between a limited range of sensors and other devices supporting agricultural tractors and machines fixed on the tractor to the desired standard digital data bus system has been applied. This standard applies to digital data bus system is not equipped with a low standard tractor with limited data exchange device.

Document data

International classification (ICS): 65.060.10.

Chinese classification (CCS): T60.

Estimated length of the Chinese original: 7,785 words.

Adopted international standard: ISO 11786-1995, IDT.
