What this standard covers

This standard specifies the concrete target under test wells perforation perforator ground conditions, perforating steel target temperature and pressure test, simulated perforation test wells (for a downhole explosives dose of no more than 1. 8kg of perforator test), Berea sandstone target perforation perforating bomb tests under stress conditions, perforation flow characteristics test under simulated downhole conditions, ground wearing steel target perforation test, perforating gun temperature and pressure tests. This standard applies to oil and gas well perforating gun, perforated shells, perforating gun tests.

Document data

International classification (ICS): 71.100.30.

Chinese classification (CCS): G89.

Estimated length of the Chinese original: 37,314 words.

Adopted international standard: API RP 19B-2000, MOD.
