What this standard covers

This standard specifies the total reflectance measured using integrating sphere aluminum and aluminum alloy surfaces and methods of the anti- reflective properties. The method is also applicable to the specular reflection (the main gloss), values ??of measured specular and diffuse reflection values.

Document data

International classification (ICS): 25.220.20.

Chinese classification (CCS): H20.

Estimated length of the Chinese original: 8,876 words.
