What this standard covers

This standard provides for loaded printed circuit boards with paint (conformal coatings) of electrically insulating material definition, classification and general requirements. This section does not include coatings and printed circuit board compatibility between the requirements for special applications, compatibility should conduct a special assessment. This section does not include only the non- cured coating is formed, a lower surface of the protective effect of the modifier. This section applies to the printed circuit board carrying paint (conformal coatings).

Document data

International classification (ICS): 29.035.99.

Chinese classification (CCS): K15.

Estimated length of the Chinese original: 5,593 words.

Adopted international standard: IEC 61086-1-2004, IDT.
