

ICS 23.100.60; 73.080
CCS Q 61

**NATIONAL STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

GB/T 20671.10-2006

**Classification system and test methods for nonmetallic gasket
materials -- Part 10: Standard practice for evaluating thermal
conductivity of gasket materials**

非金属垫片材料分类体系及试验方法 第10部分：垫片材料导热系数测定方法
(English Translation)

Issued on: December 7, 2006

Implemented on: July 1, 2007

**Issued by: General Administration of Quality Supervision, Inspection and
Quarantine of the People's Republic of China, Standardization
Administration of the People's Republic of China**

What this standard covers

This standard provides a quantitative measurement of the number of heat transfer through the material or systems approach. This method is similar to ASTM C518 heat flow meter system, but this method improves the small test sample containers to accommodate high thermal capacity is standard in International System of Units (SI) units. This section does not involve safety issues associated with their use. Users of this section has the responsibility to consider the safety and health issues.

Document data

International classification (ICS): 23.100.60; 73.080.

Chinese classification (CCS): Q61.

Estimated length of the Chinese original: 11,112 words.

Adopted international standard: ASTM F433-2002, IDT.
