What this standard covers

This standard specifies test methods tensile strength of some non-metallic gasket materials at room temperature for. Type of material containing asbestos, including fibers and other inorganic GB/T 20671. 1 described, cork, cellulose and other organic fibers, flexible graphite material. This test method is not applicable to vulcanized rubber and rubber O-rings, vulcanized rubber test methods in the test method described in ASTM D412, Test Method for Rubber O-ring is described in the test method ASTM D1414. Value in International System of Units (SI) units as standard. The depression of not involving safety issues associated with their use. Users of this section has the responsibility to consider the safety and health issues, and regulatory limitations prior to use to determine the scope of application.

Document data

International classification (ICS): 23.100.60, 73.080.

Chinese classification (CCS): Q61.

Estimated length of the Chinese original: 9,926 words.

Adopted international standard: ASTM F152-1995 (2002), IDT.
