### What this standard covers

This standard specifies the temperature from room temperature curing reaction or commercial thermosetting resin molding material when it is exposed to water, and the combined effect of high temperatures, Standard Test Method for its hydrolytic stability. This part of the test method for measuring the mechanical and electrical properties of irreversible change, but not the mechanical stresses applied to the specimen.

### Document data

International classification (ICS): 29.035.20.

Chinese classification (CCS): K15.

Estimated length of the Chinese original: 6,658 words.

Adopted international standard: IEC 61234-2-1997, IDT.
