What this standard covers

This standard specifies the method for the determination of water content of natural gas. The pressure cap on the maximum pressure device can withstand the test face. This standard applies to water containing no less than in the 10 mg/m³, sulfur-free gas and acid gas containing hydrogen sulfide. This standard is the standard reference conditions for measurement of gas volume 293. 15 K, 101. 325 kPa.

Document data

International classification (ICS): 75.060.

Chinese classification (CCS): E24.

Estimated length of the Chinese original: 10,191 words.

Adopted international standard: ISO 11541-1997, MOD.
