CCS E 92

**NATIONAL STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

GB/T 21412.4-2013

Replacing GB/T 21412.4-2008

**Petroleum and natural gas industries -- Design and operation of
subsea production systems -- Part 4: Subsea wellhead and tree
equipment**

石油天然气工业 水下生产系统的设计与操作 第4部分：水下井口装置和采油树设备

(English Translation)

Issued on: December 31, 2013

Implemented on: October 1, 2014

Issued by: Standardization Administration of China

Table of Contents

Preface	
1 Scope	
2 Normative references	
3 Terms, definitions, symbols and abbreviations	
3.1 Terms and definitions	
3.2 Symbols and Abbreviations	
4 Use conditions and product specification level	
11 4.1 Conditions of Use	
4.2 Specification level	
5 General System Requirements	
5.1 Design and performance requirements	
5.2 Materials	
5.3 Welding	
5.4 Quality Control	
26 5.5 Equipment logo	
5.6 Storage and shipping	
6 Overall design of subsea production tree and tubing hanger of claim	
6.1 General	

1 Scope 1

2 Normative references	3
3 Terms, definitions, symbols and abbreviations	4
3.1 Terms and definitions	4
3.2 Symbols and Abbreviations	9

4 Use conditions and product specification level 11

11 4.1 Conditions of Use	4.2 specification level	11
5 General System Requirements		12
5.1 Design and performance requirements		12
5.2 Materials		22

5.3 Welding 22

5.4 Quality Control 23

26 5.5 Equipment logo

5.6 Storage and shipping 27 6 overall design of subsea production tree and tubing hanger of claim 28

6.1 General 28

Christmas Tree Manifolds 29 6.2 6.3 subsea tree assembly test 37 6.4 mark 37

6.5 Storage and shipping 41 7 specific requirements --- subsea trees and related equipment and sub-assembly 41

7.1 Flanged end and outlet connections 41

7.2 ISO hub connecting clamp 54

7.3 Threaded connections 54 7.4 other end of the connection means 55 7.5 studs, nuts and bolts 55 7.6 gasket ring 55

7.7 Completion guide base 56

7.8 Christmas tree and tubing head connecting means 57

7.9 Vertical Christmas tree on the buckle or seal fitting 60 7.10 valves, manifolds, and drives 61

7.11 TFLY shaped short section 71 and diverter

Reentry interface 72 7.12 7.13 subsea tree cap 73

7.14 Christmas tree cap running tool 76

7.15 Christmas tree guide frame 78

7.16 Christmas tree running tool 81

7.17 Christmas tree line 84 7.18 oil pipeline system connecting means 85

7.19 Auxiliary equipment running tool 88

Hydraulic or electric or optical 7.20 Christmas tree installed in the control connection 89

7.21 Underwater throttle and drive 92

Other equipment 101 7.22 8 --- the specific requirements of the subsea wellhead apparatus 105

8.1 General 105

8.2 Temporary guide base 105

8.3 106 permanent guide base 8.4 catheter tip 110 8.5 wellhead 112 8.6 casing hanger 114
8.7 annulus sealing assembly 116 8.8 casing hanger lock bushing 117 8.9 aperture and
wear protection liner 118 8.10 corrosion cap 120 8.11 fed, the recovery and test tool 120

8.12 Trawl protective structure 120

Inclination and orientation of wellhead 120 8.13 8.14 underwater mud line casing hanger
and seal assembly 121 9 specific requirements --- underwater tubing hanger system 121

9.1 General 121

9.2 Design 121

9.3 Materials 124

9.4 Test 124

10 specific requirements --- mud line suspension device 124

10.1 General 124

10.2 take place or mud line suspension lift ring 128 10.3 casing hanger 128

10.4 Casing hanger running tool joints and back 130

130 10.5 capping abandoned wells

10.6 Completion underwater mud line conversion apparatus 130 10.7 tubing hanger and
completion systems --- underwater mud line conversion apparatus 131 11 specific
requirements --- drilling through the mud line suspension device 131

11.1 General 131

11.2 External drilled through the casing hanger (mixed casing hanger outside of the
housing) 132 11.3 mixing casing hanger housing 132

11.4 Internal drilled through the mud line casing hanger 133

11.5 Annulus sealing assembly 135

11.6-hole protection devices and wear bushing 136 11.7 tubing hanger and completion
systems --- underwater drilling equipment through the mud line 137 137 11.8 capping
abandoned wells

11.9 Fed, the recovery and test tools 137

Appendix A (informative) vertical underwater Christmas tree 138

Annex B (informative) 142 underwater horizontal christmas tree

Annex C (informative) underwater wellhead 145

Annex D (informative) underwater tubing hanger 147

Appendix E (normative) mud line suspension and conversion system 150

Annex F (informative) drilling through the mud line suspension system 157

Appendix G (Informative Appendix) ISO (API) bolt flanged assembly guide 159

Appendix H (informative) underwater wellhead into the recovery and test tools designed and tested to 167

Annex I (informative) coating system application 169

Screening Annex J (informative) material compatibility 172 Annex K (informative) to enhance the design and testing of the lug plate 176 Annex L (informative) High Pressure Test Guideline 188 Annex M (informative) 190 Buyer's Guide Appendix NA (informative) of this section and GB/T 21412.4-2008 major technological changes 206 References 210 1 double subsea wellhead apparatus Path Christmas Tree Example 31
