### What this standard covers

This standard specifies the water and glycols (including ethylene glycol, diethylene glycol, propylene glycol) -based components, adding anti-wear agents, oily agent, rust agent additives made ??of water-requirements and test methods glycol -based fire-resistant hydraulic fluids, inspection rules and signs, packaging, transport and storage. This standard applies to the metallurgical product belongs, machinery manufacturing, mining and other industries in a hydraulic system flame resistance requirements. For example: furnace steel mill hydraulic system, hydraulic system of high speed wire, hot rolling mill rolling machine hydraulic systems.

### Document data

International classification (ICS): 75.120.

Chinese classification (CCS): E39.

Estimated length of the Chinese original: 6,675 words.

Adopted international standard: ISO 12922-1999, NEQ.
