

ICS 29.120.70; 31.220.99
CCS L 25

**NATIONAL STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

GB/T 21711.10-2025

**Electromechanical elementary relays - Part 10: Additional
functional aspects and safety requirements for high-capacity
relays**

(English Translation)

Issued on: May 30, 2025

Implemented on: May 30, 2025

**Issued by: State Administration for Market Regulation, China National
Standardization Administration**

Table of Contents

Preface	
Introduction	
1 Scope	
2 Normative references	
3 Terms and Definitions	
3.5 Terms and definitions related to contacts	
4 Influence	
5 Rated value	
5.6 Electrical durability	
5.7 Working speed	
5.8 Contact load	
6 General test rules	
7 Documents and logos	
8 Temperature rise	
8.4.4 Threaded and unthreaded terminals	
8.4.5 Alternative terminal types	
8.4.6 Socket	
9 Basic working functions	
10 Dielectric withstand voltage	
11 Electrical durability	
11.1 General	
11.2 Overload test	
11.3 Severity Level	
12 Mechanical durability	
13 Clearances, creepage distances and solid insulation	
13.1 General	
13.2 Clearance and creepage distances	
13.3 Solid insulation	
13.3.1 General	
13.3.2 Partial discharge	
13.6 System Insulation Coordination Assessment	
13.6.1 General	

- 13.6.2 Specific procedures
- 13.6.3 Condition
- 13.6.4 Test Procedure
- 13.6.5 Data evaluation
- 14 Lead terminal
 - 14.1 General
 - 14.2 Threaded and unthreaded terminals
- 15 Seal
- 16 Heat and fire resistance
- 17 Special Test
- Appendix A (Normative) Interpretation of relays
- Appendix B (Informative) Test Device
- Appendix C (Normative) Test Device
- Appendix D (Informative) Special loads
- Appendix E (Normative) Temperature rise test configuration
- Appendix F (Normative) Measurement of electrical clearance and creepage distance
- Appendix G (Normative) Relationship between rated impulse voltage, rated voltage and overvoltage category
- Appendix H (Normative) Pollution Degree
- Appendix I (Normative) Tracking resistance test
- Appendix J (Informative) Terminal Series Diagram
- Appendix K (Normative) Glow-wire test
- Appendix L (Normative) Ball Pressure Test
- Appendix M (Informative) Needle flame test
- Appendix N (Informative) Standard welding process resistance
- Appendix O (Informative) Risk Assessment
- Appendix P (Informative) Mechanical properties of lead terminals
 - P.1 General
 - P.2 Mechanical strength of lead terminals
 - P.2.1 General
 - P.2.2 Test procedure
 - P.2.3 Requirement
 - P.3 Bending test (conductor damage and accidental loosening test)
 - P.3.1 General
 - P.3.2 Test procedure

P.3.3 Requirement

P.4 Pull-out test

P.4.1 General Principles

P.4.2 Test procedure

P.4.3 Requirement

Appendix Q (Normative) Long-term stability of seals (leakage rate evaluation)

Q.1 General

Q.2 Test procedure

Q.2.1 Preprocessing

Q.2.2 Evaluation

Q.2.3 Requirement

Appendix R (Informative) Short-circuit capacity

R.1 General

R.2 Test procedure

R.2.1 General

R.2.2 Pretreatment

R.2.3 Test circuit setting

R.2.4 Test procedure and/or sequence

R.3 Requirement

R.4 Test conditions

Appendix S (Informative) Special Application Test Photovoltaic System

S.1 General

S.2 Insulation coordination

S.3 Product marking

S.4 Performance requirements---Electrical durability

S.5 Type test

S.5.1 Overview

S.5.2 Short circuit test

S.5.3 Critical DC load current test

S.5.4 Climate test

S.5.5 Special tests - salt spray, vibration and shock

Appendix T (informative) Special application test road vehicles

T.1 General

T.2 Road vehicles

T.2.1 General requirements

T.2.2 Instantaneous drop in supply voltage

T.2.3 Reset behavior when coil voltage drops

T.2.4 Coil overvoltage

T.2.5 Slow drop and rise of supply voltage

T.2.6 Electrical durability

T.2.7 Noise

T.2.8 Vibration

T.2.9 Impact
