What this standard covers

This standard specifies the paint, varnish, paint binders, solvents, petroleum or related products a flash point determination. Suitable for determining the standard water-based paint, water-based paint can be ISO 3679 measurement method. This standard is applicable in the temperature range of instruments adopted under varies from -30°C to 110°C. A mixed solvent containing halogenated hydrocarbon measured results should be given attention, because these mixed solvents may give irregular results.

Document data

International classification (ICS): 13.300.

Chinese classification (CCS): A80.

Estimated length of the Chinese original: 12,188 words.

Adopted international standard: ISO 1523-2002, IDT.
