What this standard covers

This standard specifies the inherent biodegradability of chemicals improved semi-continuous activated sludge test method overview, test preparation, test procedures, quality assurance and quality control, data and reports. This standard applies to test water soluble, the test concentration test concentration of microorganisms without inhibition, and then test the surface of the glass container without significant adsorption, not because of the loss of organic foaming solution inherent biodegradability.

Document data

International classification (ICS): 13.300; 13.020.40.

Chinese classification (CCS): A80.

Estimated length of the Chinese original: 8,841 words.

Adopted international standard: OECD No.302A-1981, IDT.
