**NATIONAL STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

GB/T 21855-2008

Chemicals -- Test of hydrolysis as a function of pH

化学品 与pH有关的水解作用试验

(English Translation)

Issued on: May 12, 2008

Implemented on: September 1, 2008

Issued by: Standardization Administration of China

What this standard covers

This standard specifies the chemical hydrolysis of pH test range, definitions of terms, test principle, the test substance information, reference material, quality control, testing methods, data and reporting, interpretation of results and evaluation. This standard applies to the determination of pH on chemical hydrolysis capabilities. This standard applies to those with sufficient accuracy and sensitivity of the analytical method compounds. For minor volatile and non -volatile compound having a sufficiently high water solubility. Not applicable to highly volatile, under the experimental conditions to be stored in an aqueous solution of the compound. On very small water-soluble substances are difficult to test.

Document data

International classification (ICS): 13.300.

Chinese classification (CCS): A80.

Estimated length of the Chinese original: 16,131 words.

Adopted international standard: OECD No.111-2004, IDT.
