What this standard covers

This standard specifies the method of calculating dozer capacity. The purpose for the bulldozer (according to GB/T 8498 definition) commercial paper of blade capacity provides a unified method of comparison. This standard is not used to predict the bulldozer bulldozer productivity or the productivity of the actual conditions may be observed in a variety of specific conditions to determine the productivity of bulldozers in these situations, you need to consider other parameters. If dozer efficiency, bulldozer power, traction, soil characteristics, terrain, operator skill level and duty cycle and so on. This standard applies to the installation on the GB/T 8590 defined the types of bulldozer dozer, including straight blade, angle dozer, half U -shaped and U -shaped blade.

Document data

International classification (ICS): 53.100.

Chinese classification (CCS): P97.

Estimated length of the Chinese original: 8,863 words.

Adopted international standard: ISO 9246-1988, IDT.
