What this standard covers

This standard specifies the 55 ° sealing pipe thread gauge design, dimensions and manufacturing tolerances, inspection, markings. This section provides a gauge system (without special tips, some of the provisions of this system can not be used to gauge the injection molding parts threaded test) applicable to test GB/T 7306. 1-2000 prescribed cylindrical threaded and tapered external threads.

Document data

International classification (ICS): 17.040.30.

Chinese classification (CCS): J42.

Estimated length of the Chinese original: 24,217 words.

Adopted international standard: ISO 7-2-2000, MOD.
