The previous versions of this document and the documents it replaces are as follows:

---First published in.2008 as GB/T 22118-2008;

---This is the first revision.

Effectively collect and integrate credit information in accordance with laws and regulations, establish a unified platform, realize the sharing of credit information resources and its application in various fields of economy and society The application of the domain is the foundation of the entire social credit system construction, and it is also an important task to strengthen the credit construction of enterprises. In the process of building a new pattern of social governance, enterprises are the basic units of social economy and the first responsible persons for market order. Enterprise credit information has become a capital with rich connotations and can improve the efficiency of resource allocation. It is also the basis for conducting corporate credit evaluation, fully tapping the value of data, promoting coordinated supervision and credit incentives and constraints, and actively expanding application scenarios. Promoting standardized and normative credit information collection, processing and provision methods can not only provide a strong support for the low-risk and high-quality development of enterprises, but also The issuance of this standard will help improve the supervision methods and approaches. The regulatory approach is shifting towards being "service-oriented" and "smart". To standardize the management of corporate credit information, carry out the collection, sharing, processing and application of enterprise-related information in accordance with laws and regulations, and improve the collaborative efficiency of regulatory applications and the level of corporate credit construction, safeguarding corporate credit information security and the rights and interests of information subjects, the Credit Supervision Department of the State Administration for Market Regulation conducted extensive research and analysis. Based on the analysis of the business needs of relevant parties, relevant units are organized to compile guidelines for the collection, processing and provision of corporate credit information to strengthen corporate credit information. Sharing and interaction of information, strengthening the standardized use of corporate credit information, preventing and resolving corporate credit risks, and achieving high-quality development of credit-based business entities Exhibition empowerment and efficiency improvement. Guidelines for the Collection, Processing and Provision of Corporate Credit Information

1 Scope

GB/T 22118-2025 is the Chinese national standard on guidelines for enterprises credit information collecting, processing and providing, in the field of services and company organization. The /T suffix marks it as a recommended standard: it is not compulsory by itself, but it becomes binding as soon as a contract, a tender or a customer specification calls it up - which in practice is how most foreign buyers meet it. It was issued on 1 August 2025 by the State Administration for Market Regulation; Standardization Administration of China, and has been in force since 1 August 2025. Classification: ICS 03.080.99, CCS A20.

This page is published from the official record of the standard held by the Chinese standards administration: the identification, the dates, the classification and the issuing body are taken from there. The clause text, the tables and the numeric limits are in the document itself, which is delivered complete in English translation.

This document provides guidance on the collection, processing and provision of corporate credit information and provides relevant information. This document is applicable to the collection, processing and provision of corporate credit information.
