Introduction

Since the release and implementation of the Enterprise Credit Data Specification (GB/T 22120-2008) in 2008, it has played a significant role in standardizing the collection of enterprise credit information.

It has played an important supporting and normative role in promoting the improvement of corporate credit management systems and safeguarding the construction of social credit systems.

With the acceleration of China's marketization process, the credit environment continues to develop and improve, and the corporate credit data items and related contents are modified, The need for supplementation and improvement is becoming increasingly urgent. The Credit Supervision Department of the State Administration for Market Regulation has organized a Organize relevant units to investigate and analyze the current status of enterprise credit data sharing and exchange across the country, summarize enterprise credit risk control information and enterprise credit risk information Public credit information further clarifies the scope of corporate credit information, and promotes the collection, sharing and disclosure of corporate credit information in accordance with laws and regulations.

and provide support for accelerating the efficient sharing and application of corporate credit information.
