What this standard covers

This standard specifies the Good Laboratory Practices related terms and definitions, as well as the main technical specifications, including testing the organization and personnel, quality assurance programs, facilities, equipment, materials and reagents, test systems, test samples and reference, standard operating program, the implementation of the study, the findings of the reports, records and materials storage and safekeeping. This standard covers the principles stipulated in the non-clinical GLP health and environmental safety studies, including in the laboratory, greenhouse and field work carried out. In addition to national legislation explicitly exempted under this standard GLP principles apply to regulations required all non- clinical health and environmental safety studies, including pharmaceuticals, pesticides, food additives and feed additives, cosmetics, veterinary drugs and similar products registered or applied permits, and industrial chemicals management.
