What this standard covers

This standard specifies the determination of molybdenum content using ?-benzoin oxime gravimetric method. This standard applies to steel, determination of molybdenum content of high-temperature alloys and precision alloys. Measuring range: 1. 00% - 9. 00%.

Document data

International classification (ICS): 77.08.

Chinese classification (CCS): H11.

Estimated length of the Chinese original: 7,755 words.

Adopted international standard: JIS G1218-1981, NEQ.

Supersedes the earlier edition GB 223.28-1984.
