What this standard covers

This standard applies to steel, alloy steel, high temperature alloys and precise determination of the amount of tantalum alloys. Measurement range: 0. 010 to 0. 50%. This standard is complied with GB 1467-78 "Methods for chemical analysis of metallurgical products and a standard General Yin requirements. "

Document data

International classification (ICS): 77.08.

Chinese classification (CCS): H11.

Estimated length of the Chinese original: 4,453 words.

Supersedes the earlier edition YB 35 (14) -1978.
