How a Chinese national standard is set out

About this English translation

Foreword

This standard was drafted in accordance with the rules given in GB/T 1.1-2009. This standard replaces GB/T 22861-2009 "fine combed wool fabric" and GB/T 22863-2009 "semi-worsted wool". Compared with GB/T 22861-2009 and GB/T 22863-2009, the main technical changes of this standard are as follows:

---Modified normative references (see Chapter 2);

--- Revised the assessment index of fracture strength (see Table 1.4.1, Table 4.4.2 of GB/T 22861-2009);

--- Revised the evaluation item for dry fastness fastness, modified from solvent change to smudge stain (see Table 4.4.2, GB/T 22861- Table

4.4.3 of.2009 2);

--- Revised Table 2, Table 3 (see Table 2.4.2, Table 2.4.3, Table 2, Table 3 of GB/T 22863-2009);

5.2 in GB/T 22861-2009 and

5.2 in GB/T 22863-2009;

--- Revised the physicochemical test sampling regulations (see 6.1.1,

5.1 of GB/T 22861-2009,

5.1 of GB/T 22863-2009);

--- Removed the test method for falling water deformation (see Appendix B of GB/T 22861-2009, Appendix B of GB/T 22863-2009);

---Modified inspection rules (see B.1, B.2, 6.1, 6.2, 6.3,

1 Scope

GB/T 22861-2018 is the Chinese national standard on worsted yarn interweave with woollen yarn fabric and semi-worsted fabric, in the field of textile and leather technology. The /T suffix marks it as a recommended standard: it is not compulsory by itself, but it becomes binding as soon as a contract, a tender or a customer specification calls it up - which in practice is how most foreign buyers meet it. It was issued on 28 December 2018 by the State Administration for Market Regulation; Standardization Administration of China, and has been in force since 1 July 2019. Classification: ICS 59.080.30, CCS W23. This page is published from the official record of the standard held by the Chinese standards administration: the identification, the dates, the classification and the issuing body are taken from there. The clause text, the tables and the numeric limits are in the document itself, which is delivered complete in English translation.

This standard specifies the technical requirements, test methods, inspection rules and packaging marks for fine carded and semi-combed wool. This standard is applicable to the identification of all kinds of woven fine combed and semi-combed wool (30% wool and other animal fiber content) The quality of the above.

2 Normative references

The following documents are indispensable for the application of this document. For dated references, only dated versions apply to this article. Pieces. For undated references, the latest edition (including all amendments) applies to this document.

GB/T 250 Textile color fastness test for gray color card for color change

GB/T 2910 (all parts) Quantitative chemical analysis of textiles

GB/T 3917.2 Textile fabrics - Tearing properties - Part 2. Determination of tear strength

GB/T 3920 Textile color fastness test color fastness to rubbing

GB/T 3922 Textile color fastness test color fastness to perspiration Textile fabrics - Tensile properties - Part 1. Determination of breaking strength and elongation at break (strip method)

GB/T 4666 Determination of length and width of textile fabrics

GB/T 4802.1 Determination of pilling performance of textile fabrics - Part 1

GB/T 5296.4 Instructions for use of consumer products - Part 4. Textiles and clothing

GB/T 5711 Textile color fastness test color fastness to dry cleaning of tetrachloroethylene

GB/T 5713 Textile color fastness test color fastness to water

GB/T 6152 Textile color fastness test heat resistance color fastness

GB/T 8427-2008 Textile color fastness test resistance to artificial light color fastness. xenon arc
