

ICS 85.010
CCS Y 30

**NATIONAL STANDARD OF THE
PEOPLE'S REPUBLIC OF CHINA**

GB/T 22898-2008

**Paper and board -- Determination of tensile properties --
Constant rate of elongation method (100mm/min)**

纸和纸板 抗张强度的测定 恒速拉伸法(100mm/min)

(English Translation)

Issued on: December 30, 2008

Implemented on: September 1, 2009

Issued by: Standardization Administration of China

What this standard covers

This standard specifies the use of a constant tensile speed 100mm/min test instrument measuring tensile strength, fracture elongation, tensile energy absorption and tensile stiffness method. And provides tensile index, tensile energy absorption index, calculated tensile stiffness index and elastic modulus. Compared with other properties of tensile strength, tensile stiffness measurement accuracy requirements for higher elongation. If a lower accuracy of the measurement of the elongation. Tensile stiffness values ??obtained would be inconsistent with this standard. This standard applies to all paper and paperboard, including paper high elongation, such as crepe paper and stretch of sack paper. This standard does not apply to low-density paper, such as paper and tissue products.

Document data

International classification (ICS): 85.010.

Chinese classification (CCS): Y30.

Estimated length of the Chinese original: 10,117 words.

Adopted international standard: ISO 1924-3-2005, MOD.

Standards quoted by this document
