1 Scope

GB/T 22919.12-2024 is the Chinese national standard on aquatic feed - part 12: formula feed for crucian carp, in the field of agriculture. The /T suffix marks it as a recommended standard: it is not compulsory by itself, but it becomes binding as soon as a contract, a tender or a customer specification calls it up - which in practice is how most foreign buyers meet it. It was issued on 15 March 2024 by the State Administration for Market Regulation; Standardization Administration of China, and has been in force since 1 October 2024.

Classification: ICS 65.120, CCS B54. This page is published from the official record of the standard held by the Chinese standards administration: the identification, the dates, the classification and the issuing body are taken from there. The clause text, the tables and the numeric limits are in the document itself, which is delivered complete in English translation.

This document defines the terms and definitions of carp feed, gives product classification, and stipulates technical requirements, inspection rules, labeling, packaging, etc. The packaging, transportation, storage and shelf life are described, and the corresponding sampling and testing methods are described. This document applies to the production and use of crucian carp feed.
