This standard is proposed and managed by the National Certification and Accreditation Administration Committee. This standard was drafted. People's Republic of China Fujian Exit Inspection and Quarantine. The main drafters of this standard. Min Bao dry, Chen Bin, Lin Minghui, Lin Liang, Yin Honglei, Lin Zhiwu. Importers infant toddler with safety requirements and test methods

1 Scope

GB/T 23159-2008 is the Chinese national standard on safety requirements and test methods of walking strap for babies and young children for import and export, in the field of domestic and commercial equipment, entertainment, sport. The /T suffix marks it as a recommended standard: it is not compulsory by itself, but it becomes binding as soon as a contract, a tender or a customer specification calls it up - which in practice is how most foreign buyers meet it. It was issued on 30 December 2008 by the General Administration of Quality Supervision, Inspection and Quarantine of the People's Republic of China; Standardization Administration of China, and has been in force since 1 September 2009. Classification: ICS 97.190, CCS Y04. This page is published from the official record of the standard held by the Chinese standards administration: the identification, the dates, the classification and the issuing body are taken from there. The clause text, the tables and the numeric limits are in the document itself, which is delivered complete in English translation.

This standard specifies the toddler infant use when practicing walking in adults with the help of the safety requirements (hereinafter referred to as toddlers) and test method. This standard is applicable for use in infants toddler with import and export products. This standard does not apply to medical and toddlers with their own means of moving frame supporting toddler products. Toddler with connector or with toys and accessories for children to play, and should comply with the relevant standards.
