- Revised size requirements (see 5.2,.2008 version 4.2);
- Increasing filler requirements and test methods (see
- Modify the moisture content of the test method (see 6.4,.2008 Edition 5.3);
- Modified formaldehyde content requirements and test methods (see

1 Scope

GB/T 23172-2017 is the Chinese national standard on plaited rattan products, in the field of domestic and commercial equipment, entertainment, sport. The /T suffix marks it as a recommended standard: it is not compulsory by itself, but it becomes binding as soon as a contract, a tender or a customer specification calls it up - which in practice is how most foreign buyers meet it. It was issued on 29 December 2017 by the General Administration of Quality Supervision, Inspection and Quarantine of the People's Republic of China; Standardization Administration of China, and has been in force since 1 July 2018. Classification: ICS 97.195, CCS Y87. This page is published from the official record of the standard held by the Chinese standards administration: the identification, the dates, the

classification and the issuing body are taken from there. The clause text, the tables and the numeric limits are in the document itself, which is delivered complete in English translation.

This standard specifies the classification of rattan products, technical requirements, test methods, inspection rules, signs, packaging, transportation and storage. This standard applies to rattan or rattan-based fabric material woven with rattan products.
