Reference

Foreword

This standard is proposed Conversion Project quality evaluation index and evaluation methods. Quality assessment indicators, including afforestation and management quality indicators Two indicators of quality indicators for each indicator and scoring rules.

Appendix A of this standard is an informative annex.

This standard is proposed and managed by the State Forestry Administration.

This standard by the State Forestry Administration of Grain for Green Project Manager responsible for drafting.

1 Scope

This standard specifies the Grain Quality of Afforestation and management quality evaluation index two aspects of Grain for Green Project and Quality Assessment method.

This standard applies to countries approved the implementation of Grain for Green Project.

2.1 Quality Evaluation Index

Grain for Green Project Quality Assessment Index into afforestation quality indicators and manage two types of quality indicators, quality indicators, including afforestation five aspects 12 indicators, management quality indicators include six aspects of 18 indicators (see Appendix A).

2.2 Afforestation Quality Index

Quality indicators include afforestation Forest land selection, seed quality and effectiveness of afforestation, mixed and intercropping, tending management and protection of five areas 12 index.

2.2.1 Forest selected

2.2.1.1

Indicator 1. key areas ????? area ratio. Key counties average ????? area with non-key county average Abandoned Lands Also the ratio of forest area.

2.2.1.2

Target 2. to focus class ????? area ratio. Focused class ????? area occupies a total area of \u200b\u200bone hundred ????? Division ratio.

2.2.2 Seed Quality

2.2.2.1

Indicator 3. Pedigree usage. The percentage of the total area of \u200b\u200bthe live broadcast afforestation area accounted for using the seed.

2.2.2.2

Target 4. seedlings yield. Planting seedlings used in two or more of the total number of trees as a percentage of the actual total number of trees with seedlings afforestation.

2.2.3 Effect of Afforestation

2.2.3.1

Indicator 5. Plan completion rate. The percentage of planned afforestation area complete area accounts.

2.2.3.2

Indicator 6. When the yield. Afforestation year survival percentage when the total afforestation area of \u200b\u200bqualified area accounts.

2.2.3.3

Indicator 7. saving rate over the years. Over the years the percentage of the total area of \u200b\u200bafforestation afforestation over the years to save qualified area accounts.

2.2.4 Mixed and intercropping

2.2.4.1

Indicator 8. Mixed ratio. Mixed percentage of the total area.

2.2.4.2

Indicator 9. Grass intercropping ratio. The percentage of the total area of forest and grass intercropping.

2.2.5 Tending management and protection

2.2.5.1

Indicator 10. tending rate. Tending percentage of the total area.

2.2.5.2

Indicator 11. Management and Protection rate. Percentage management and protection of the total area.

2.2.5.3

Indicator 12. forest and water conservation measures rate. Take water conservation measures the percentage of forest area forest area accounts.

2.3 Management Quality Index

Management quality indicators including organizational leadership, planning and design, inspection and acceptance, policy cash, records management, follow-up management aspects 18 6 index.

2.3.1 Organizational leadership

2.3.1.1

Target 13. Institutions operation. Leading group and office operations.

2.3.1.2

Target 14. Provincial funding for the work to implement. Provincial finance the actual implementation of the total funding, including workers provincial project management for the funding and implementation of the funding for the work of the county.
