What this standard covers

This standard specifies the inorganic chemical products by flame atomic absorption spectrometry terminology and definitions, principle of the method, reagents, materials, instrument, determination, precision, instrument laboratory conditions and safety. This standard applies to the preparation of flame atomic absorption spectrometry method, research methods, training and education as well as the acceptance of the measuring instrument.

Document data

International classification (ICS): 71.060.01.

Chinese classification (CCS): G10.

Estimated length of the Chinese original: 16,185 words.

Adopted international standard: JIS K0121-2006, NEQ.
