What this standard covers

This standard specifies the bulk of fine ceramics at room temperature, whisker reinforced strength test method or particle reinforced ceramic matrix composites under uniaxial tension principle, equipment, test procedures and the results of calculation, specimens. This standard is applicable to materials development, material contrast, quality control, characterization and establishment of database design.

Document data

International classification (ICS): 81.060.30.

Chinese classification (CCS): Q32.

Estimated length of the Chinese original: 12,176 words.

Adopted international standard: ISO 15790-2008, MOD.
