Foreword

This standard is one of the symbols and environmental statement series. Environmental labels and declarations total of four series of standard criteria, in addition to three standard Quasi is.

- GB/T 24020-2000 Environmental labels and declarations - General principles;
- GB/T 24021-2001 Environmental labels and declarations - Self-declared environmental claims (II signs of environmental);
- GB/T 24024-2001 Environmental labels and declarations - Type I environmental labeling - Principles and procedures.

This standard is equivalent to international standards ISO 14025:2006 "Environmental labels and declarations III environmental declarations of principles and procedures." (In English).

For ease of use, the standard in content identical with international standards, but made the following editorial changes.

--- Remove ISO 14025. Introduction 2006, an increase of Chinese Preface;

--- For ISO 14025:2006 and other international standards that have been cited as tantamount to the adoption of national standards, this standard uses the National Standards in place of the corresponding international standards.

The Standard Appendix A and Appendix B are informative appendices.

This standard is managed by the National Standardization Technical Committee on Environment (SAC/TC207) and focal points.

This standard drafting units. China National Institute of Standardization, China Quality Certification Center CNCA Certification Institute of Technology, Chinese Environmental Bureau Graduate School, Quality Mark Certification Group Co., Ltd., China National Accreditation Centre.

Introduction

III environmental declarations provide quantified environmental life cycle product information that can be compared between having the same functionality. III Environmental declarations are.

--- By one or more organizations;

--- According to GB/T 24040 series of standards, based on independent verified life cycle assessment (LCA) data, life cycle inventory analysis (The LCI) data and information module, if necessary, including additional environmental information;

--- Use default parameters for the preparation;

--- Implementation of the plan by the responsible management, implementation of the plan may be a company or group of companies, industry sectors, trade associations, public authorities Institution or agency, an independent academic organization, or other organizations.

This type III environmental declaration standard description is intended to be applied between suppliers and buyers (B-B) of the exchange of information, but does not rule should Used between suppliers and consumers (B-C) of the exchange of information, which is due to compilers III environmental declarations can not be accurately determined its audience.

However, considering the different purchaser or user groups, information needs are still critical, such as. largest supplier SMEs, Government Procurement Fang and consumers. Establish III environmental declarations and plans prepared in accordance with Statement This standard requires awareness level of the target audience attention.
