What this standard covers

This standard specifies the requirements for life cycle assessment, and provides guidelines, including: a) LCA to determine the purpose and scope, b) life cycle inventory analysis phase, c) life cycle impact assessment stage, d) Life cycle interpretation phase, e) LCA 's report and appraisal of the assessment, f) LCA limitations, g) LCA relationships between the various stages, h) value choice and optional elements of application conditions. This standard covers the life cycle assessment studies and life cycle inventory study. On the application of LCA and LCI results should be considered in the definition of the purpose and scope of the conduct, but its application is not within the scope of this standard. This standard is not intended for use in contracts, regulations, registration and certification.

Document data

International classification (ICS): 13.020.10.

Chinese classification (CCS): Z00.

Estimated length of the Chinese original: 39,364 words.

Adopted international standard: ISO 14044-2006, IDT.

Supersedes the earlier edition GB/T 24040-1999; GB/T 24041-2000; GB/T 24042-2002; GB/T 24043-2002.
