What this standard covers

This standard provides a variety of air and vacuum systems for internal combustion engines used as rubber hoses and tubing-requirements. This standard does not apply to trucks and trailers with direct power brake hose, does not apply to the air intake and cabin air guide hose. This standard specifies the maximum temperature of the hose is typically used in a turbocharger system. All hoses when the temperature dropped to -40°C still be used.

Document data

International classification (ICS): 27.020; 83.140.40.

Chinese classification (CCS): G42.

Estimated length of the Chinese original: 10,164 words.

Adopted international standard: ISO 11424-1996, IDT.
